DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-9, drawn to a light emitting diode without a metal electrode.

Group 2, claim(s) 10, drawn to a light emitting diode with a metal electrode.

Group 3, claim(s) 11-19, drawn to a method of manufacturing a light emitting diode using dry etching and does not have a metal electrode.

Group 4, claim(s) 20, drawn to a method of manufacturing a light emitting diode using dry etching and has a metal electrode.

Group 5, claim(s) 21-23, drawn to a method of manufacturing a light emitting diode using wet etching.

The inventions listed as Groups 1-5 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Vichel Inc (KR 2004-8962) discloses a nitride micro LED with high brightness, comprising: a plurality of micro-sized luminous pillars having an n-type GaN layer formed on a substrate, and active layer formed on the n-type GaN layer, and a p-type GaN layer formed on the active layer; a gap filling material filled between the luminous pillars to have substantially the same height as the luminous pillars; a p-type transparent electrode formed on a top surface of the gap filling material and the luminous pillars; a p-type electrode formed on the p-type transparent electrode; and an n-type electrode electrically connected to the n-type GaN layer, wherein an array of the luminous pillars is driven at the same time (entire document).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
